

Ovaideu Desktop MCP Setup

Website: <https://ovaideu.com> Support: support@ovaideu.com

Use this guide to connect your approved desktop AI client to Ovaideu. Follow the links below to open the setup page, download the desktop MCP files, and authorize the Google account you use for advertising and analytics.

Links

Action	Use
Visit setup page: click here	Open the public setup page.
Start trial: click here	Create or request access before setup.
Download PDF: click here	Save this guide locally.
Download all setup files: click here	One package for desktop MCP setup.
Download share JSON: click here	Give this to an AI agent for setup context.
Claude config: click here Codex config: click here	Use the config template for the chosen client.

Step-by-step setup

1. Create or sign in to an Ovaideu account with the approved user email.
2. Select the account type: single business owner, freelancer, agency owner, or agency employee.
3. Connect Google from Ovaideu using the official email that has access to Google Ads, GA4, GTM, Search Console, and related Google properties.
4. Download the bridge package and the matching config template.
5. Install the bridge file locally and paste only that user's Ovaideu MCP/API key into the local config.
6. The AI assistant must ask which Google email should be used before opening browser authorization.
7. The user completes password, OTP, and consent directly. The AI assistant must not ask for or store those values.
8. Restart the desktop AI client and ask it to list connected accounts. It must show only that user's connected accounts.
9. Create, review, or optimize ads only after the user gives a clear instruction inside their own connected account.

Minimal config values

Value	What to use
Endpoint	https://api.ovaideu.com/api/mcp
User email	The approved Ovaideu user email.
User key	The user-bound Ovaideu MCP/API key issued for that exact email.
Origin	Use the AI client origin shown in the downloaded template.

Security rules

- You should see only the accounts connected through your own Ovaideu and Google authorization.
- Never type passwords, OTPs, recovery codes, or private Google credentials into chat.
- Use only the Ovaideu key issued for your own approved email.
- If the wrong Google profile opens, stop and switch to the correct browser profile before authorizing.
- If an account looks unfamiliar, stop and contact support before making changes.
